

## Website Update September 28, 2018

### CONSTRUCTION BEGINS ON THE WEST LAKE KATHLEEN WATER MAIN IMPROVEMENT PROJECT

The District's contractor, R.W. Scott Construction will begin construction in a small portion around West Lake Kathleen Community and the Lake McDonald area in early October. The water mains in these areas are aging and undersized.

Much of the work will occur within the right-of-way to minimize project impacts to residents. There are areas, however, that required the District to obtain private easements to install some facilities e.g., the water main and/or the water meter.

Construction is being funded using a low-interest loan the District received, which helps to keep rates affordable to customers.

#### Project Locations

There are four areas of the project shown on the map. Click on map link to view.

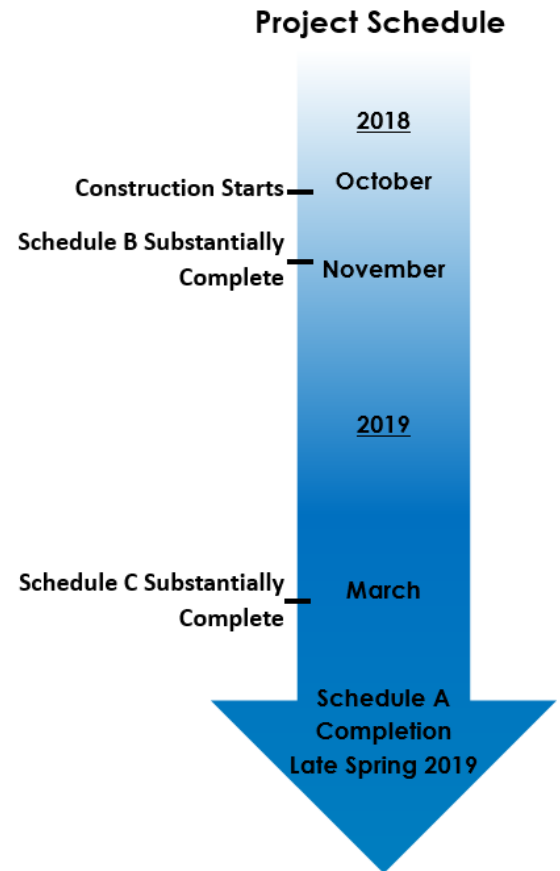

For some of the areas, the installation timeline has been specified to help minimize impacts of the construction to residents. The contractor will start construction in the south portion of West Lake Kathleen Drive where the private roadway is very narrow. Construction during the drier time of the year will help minimize the mud and impacts to the residents' ingress and egress to properties.

#### Project Outcomes

- Improve reliability of water service
- Improve fire protection and add new hydrants
- Install more than a mile of new water main and new water services (from the main to water meter boxes)
- Improve water pressure in some portions of the project where existing pressures are low

#### What Construction Means to You

- Traffic delays along the construction route
- Equipment noise, construction traffic, and dust
- Temporary interruption of property access – the contractor will coordinate access in advance of interruption
- Access will be available during non-working hours

- Notice of scheduled water service interruptions will be provided in advance of shutdowns

**General Working Hours:**

- Monday – Friday: 7 a.m. – 5 p.m.
- Weekends: Only as approved by District in advance of any work
- Some areas have other schedule restrictions

**Check back periodically for construction progress updates.**
