

NOTIFICATION TO BACKFLOW CUSTOMERS

KCWD90 has partnered with [Backflow Solutions, Inc. \("BSI"\)](#), a third-party contractor, to manage the District's Cross Connection Control Program. BSI provides a web-based tracking program and a more efficient and cost-effective means of managing the District's inventory of backflow prevention assemblies.

WHAT THIS MEANS FOR YOU AS A BACKFLOW CUSTOMER:

- Notifications will come directly from BSI and will have the device and the name of your last tester listed.
- A Customer Confirmation Number ("CCN") will be assigned to you. The CCN allows you to access your records and verify the annual test report has been submitted. [Click here to access the Customer Portal.](#)
- Annual test compliance is the end of June of every year. Tests must be submitted by this date or you risk having your water shut off.
- Your certified tester will need to upload the test report with BSI online. There is a fee associated with uploading.
