

WHAT?

Portable Intertie with City of Renton

- Emergency Agreement with the City of Renton to supply 1,250gpm if access to Pump Station #1 is impacted.
 - Pump Station #1 pumps at 2,300gpm from SPU and Supplies 95% of the Districts water use.

Who?

- ⋄ This contract is funded by FEMA.
- Once the new portable Pump Trailor is purchased, additional work will be completed by District Staff.

When?

- FEMA is currently reviewing the District's Portable trailer design.
- Project will go out to bid late 2025 or early 2026
- Oby 2026, District will have increased resiliency and water supply redundancy.

Why?

- Would allow the District to receive an emergency supply of potable water from the City of Renton.
- The District receives 2,800gpm from Seattle Public
 Utilities (SPU) at Pump Station #1.
 - ♦ The District has only **ONE** connection to SPU.
 - Objective District would be able to receive 50% (1,250gpm) of normal supply if PS #1 was damaged.
- District could add 1,250gpm to existing 2,300gpm during a wildfire event or multiple fire event.

What's Included?

- OPOP Portable Pump Trailor
- Permanent enclosure at Pump Station #1— for security
- ♦ Isolation Flow Valves
- ♦ Flow Meter
- Quick Connect Camlocks
- Backflow Prevention Device

How Much?

- ◊ Total Project is expected to cost \$400,000
- Project is funded by a "Building Resilience In Communities" (BRIC) FEMA Grant.
